Hose length	-
Max. pressure (bar)	4

Details

Description

The ground spike is part of the Kärcher Rain System®. It reliably fixes the Kärcher Rain System® hose and the soaker hose at the desired point and creates the necessary distance to the ground. The 17 cm long ground spike has a marking tool for conveniently defining the optimal insertion depth. The rubber ring on the attachment point ensures secure fixing of the hoses. The Kärcher Rain System® combines the advantages of micro-dripping and conventional watering. The highly efficient Kärcher Rain System® watering system works with up to 4 bar pressure and features a 1/2" hose with drip and spray collars. The Kärcher Rain System® can be individually adapted to almost any garden and works perfectly with the SensoTimer for need-based watering control.

Application

- Garden watering
- Flower beds, vegetable patches, hedges, bushes
-

Features & Benefits

Sharp ground spike

Easy to insert into the soil

Rubber ring for fixing

Kärcher Rain System® hose and soaker hose can be optimally fixed

Robust design

Extremely sturdy ground spike

Marking tool

Determine the optimal insertion depth

Ergonomically shaped

Easy to use
